

In the Specification

Please amend paragraph [0006] of the published application (U.S. Patent Application Publication no. 2007/0078964) as follows:

[0006] In a first aspect, there is a method of providing content to a mobile web browsing device from a web server, illustrated in Fig. 1, comprising the steps of:

Please amend paragraph [0011] of the published application as follows:

[0011] Figure 2 illustrates a system in accordance with the claimed invention. The device (206, 208) may be a mobile telephone, smart phone, communicator, laptop computer, PDA, dedicated web terminal or similar. These devices will typically operate over wide area wireless networks such as GSM, UMTS, CDMA etc. cellular networks (202). The device may optionally also (or alternatively) connect to the origin web server (204) using (at least in part) a local area wireless network, such as 902.11 or Bluetooth wireless networks. In one implementation, the log is generated at the device and replicated to the remote computer (210).

Please insert after paragraph [0018], the following:

--BRIEF DESCRIPTION OF THE DRAWINGS

[0018a] Figure 1 is a flowchart illustrating steps according to the claimed invention;

[0018b] Figure 2 is a block diagram illustrating a system according to the claimed invention.--
